

Product Information

Advantages of a Video Network System

1. Successful Presentations!

The best presentation technology ensures the best viewing conditions. Learning contents are shown in the highest quality on the participant's screen. This creates ideal means for training presentations from instructor to participants.

2. Every Student is Seated in the Front Row!

Every student sees the instructor's work on his own screen, can easily understand, and is not distracted by other programmes on his computer. Each student is therefore "sitting in the front row"!

3. The Best Viewing Conditions!

Videodidact offers the best presentation conditions in bright classrooms with big windows. The room does not need to be darkened. No participant has to "crick his neck" to see a projector screen.

4. Help Your Students Individually!

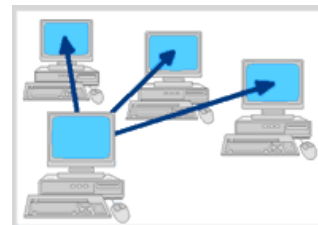

By pressing the function to view the student's work the instructor can judge the progress of his students and help solve the problems of individual students immediately by using the mouse and keyboard control function. Every student can also discreetly ask for help by pressing his help button.

5. Get Greater Attention!

As soon as the instructor would like to explain something to all the students or display something on the projector he can blank all the students' screens. The students keyboards and mice are automatically locked.

6. Operation with only One Keystroke!

All functions can be carried out with only one keystroke. The function keys are labelled clearly and can be arranged according to the seating plan.

Instructor's screen to all students

Viewing of student's screen

Transmission of student's screen to other students and to instructor
