

# VGA-Splitter/-Matrix and Amplifier

Valid since January 2006

## Active VGA-Splitter/-Amplifier 1/2, 2/2 and 3/2

### Splitter 1 / 2

1 VGA input (e. g. PC) is connected with 2 VGA outputs (e. g. monitor, projector).

Due to the 380 MHz amplifier frequency the 1/2 switch is perfect for use as signal amplifier for bypassing long cable lengths.

### VGA Matrix 2 / 2

2 VGA inputs as well as 2 VGA outputs to connect a PC or/and a notebook with a monitor, projector etc.

### VGA Matrix 3 / 2

3 VGA inputs as well as 2 VGA outputs to connect 3 VGA sources, e. g. PC, notebook, server with a monitor, projector etc.

The EBS matrix boxes 2/2 and 3/2 can be delivered in 3 different modes. Different colours of the cases are available.

## Active VGA Signal Amplifier

The **1/1 VGA-Signal Amplifier** is perfect for bypassing long cable lengths (more than 15m).

### Technical Data:

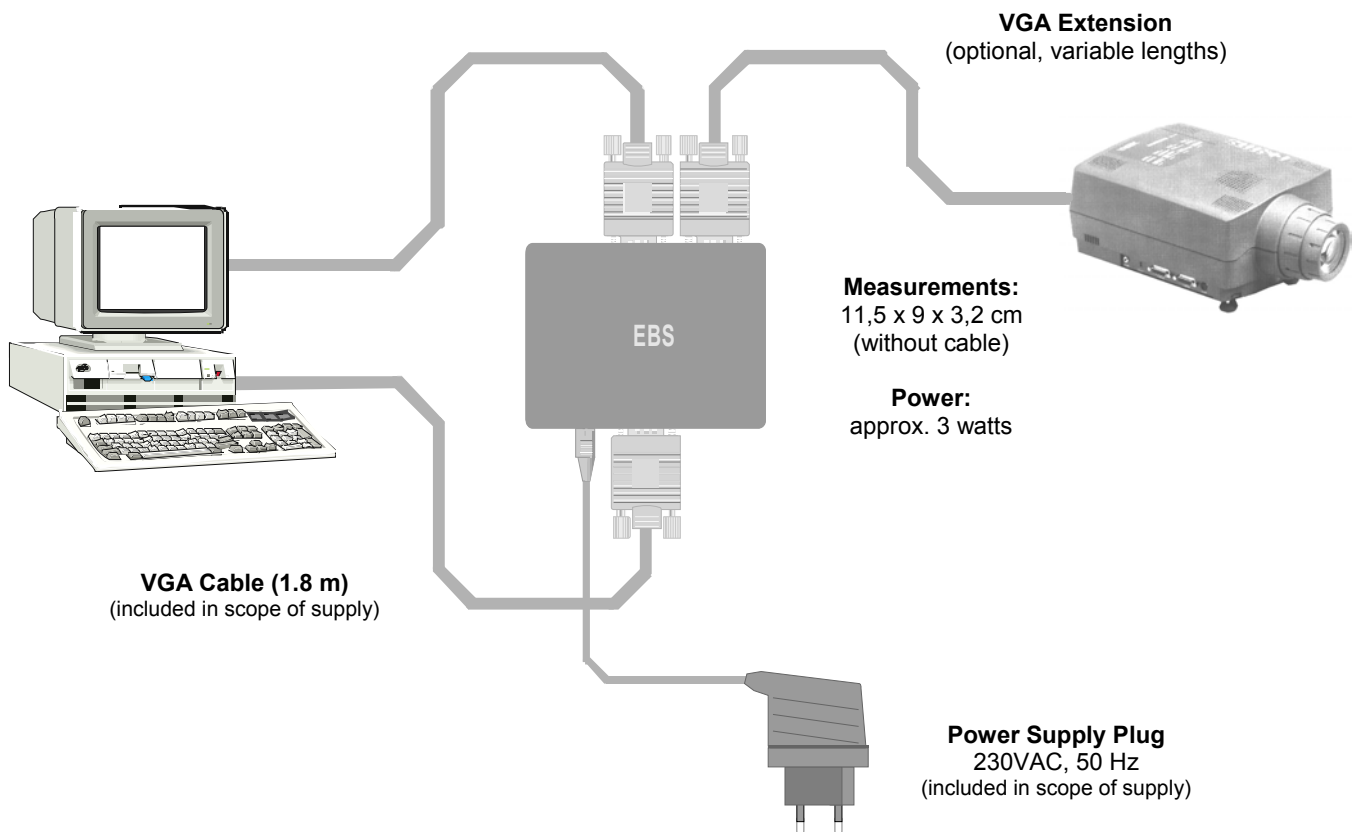

- 380 MHz for all resolutions (e. g. 1600 x 1280 und higher)
- Active VGA outputs (video amplified)
- 1 cable in scope of supply (high quality VGA cable)
- Compact design
- 3 years warranty on parts
- Delivery ex warehouse

# Connection of a VGA Amplifier 1/2

Dear customer,

You acquired a VGA Video Amplifier of our latest generation. Thank you for your confidence.

The VGA Amplifier 1/2 is equipped with 1 VGA input (e.g. for PC or notebook) and 2 VGA outputs (e.g. for monitor and projector), including 380 MHz for highest screen resolutions.

The connection is managed over a power supply plug.

**We wish you lots of success with the VGA amplifier!**
